EvoDots Answer Sheet Pre-Lab

Questions: 1. What is the source of “genetic variability?” What trait will

Where To Download Evodots Answers

affect how easily a dot will be “eaten?”

2. What are the variants of this trait / the possible phenotypes? The trait we are looking at today is controlled by a single gene. 3. What must be true about the number of alleles for this gene? 4.

EvoDots is a computer program that simulates a population of dots. You, the user, will act as a “predator” who tries to capture the moving dots (your “prey”).

We will use the EvoDots program to explore the conditions necessary for evolution by natural selection to operate in populations.

- Variable determines whether there is any variation among the dots. If you

Where To Download Evodots Answers

uncheck this box, all the dots will move at the same speed.

- Heritable determines whether speed is an inherited trait. If this box is checked, a baby dot will have the same speed as its parent (the dots reproduce asexually).
