**giantitp.com**

Personally, I found this sourcebook to be rather unpolished and lacking in focus or theme. It just feels like a random collection of monsters with a tendency towards to weird, unrealistic, and the downright ridiculous (examples: a human-torso devil with a lower body of a snail who lairs in a river, and an "all-legs" spider

However, in MMIII-V, Fiend Folio, the Fiendish Codexes, and some other random Wizards sources, there are monsters noted specifically as being summonable with Summon Monster. Since we've reached the end of 3.5 supplements, and this effort covered every book I can get my hands on, I think it won't get out of date.

Varakhut. These protect the integrity of divinity by hunting down beings who are attempting to ascend to godhood. Should the attempt be successful, however, the varakhuts will defend the new god as part of the natural order, as they are also tasked with hunting down any being who attempts to kill a god.

Description Edit. A penanggalan had two forms. During the day, the penanggalan appeared as a human female resembling its original form before undeath. At night, the penanggalan returned to its lair and its head separated from its body, revealing a 3 feet (0.91 meters) long tail.

The Monster Manual III was published in 2004, specifically, in August. While the MM2 was a 3.0 product, and the Fiend Folio was published right at the beginning of 3.5 (with a few oddities and outliers), MM3 was solidly 3.5. Gone are the Beast and Shapechanger types;
