High Sensitivity Smoke Detection (HSSD) is a great choice, especially in a cold storage warehouse. Just make sure you've got suitable dust filtration to prevent false alarms. If properly designed and installed they can be really simple to maintain. Beam Detectors are ideal for large and high level applications.

Fire Alarms for Warehouses - Blazequel

Fire above a false ceiling (dropped ceiling) in a factory can lead to catastrophic loss and damage to a factory and its workers. The large amount of dust and fiber in this area can ignite quickly if there is any spark or short circuit. Arosa Systems uses special linear heat detection cable above the false ceiling to detect the outbreak of any fire.

False Ceiling Detection System - arosasystems.com

Arosa Systems provides high-speed fire detection and control systems for industrial processes around the world. As both a manufacturer of our own product line and a systems integrator for several leading brands of fire and life safety equipment, we provide specific solutions for high risk production processes that face the constant risk of fire.
