Nbme 17 Answer Key
NBME Answers & Explanations — Updated daily. I don't like how they are asking this, but I think what they are getting at is that after the stent placement ("subsequent to the stent placement") there will be reperfusion injury to the myocardial tissue which occurs through free radical injury and therefore membrane lipid peroxidation is the best answer (FA2020 p210 mentions membrane lipid ...

NBME Answers & Explanations — Updated daily. The key for this being dissecting aneurysm is that it's a widened aortic arch. Also, there's uneven pulses ("diminished pulses in the left upper extremity") meaning that blood is not passing from the aortic arch to the left subclavian artery (it's not passing the aortic arch).

NBME Answers & Explanations — Updated daily. "Bilateral varicoceles" is the only answer choice that is associated with male infertility and fits the description of bilateral masses palpated high in the scrotum. Scrotal varicosities increase the temperature around the testes, leading to impaired spermatogenesis.
