### Teaching science through stories | STEM

Teaching Science Through Stories. We are hardwired for stories. We tell them all the time: we tell the stories of our day, the stories of our disasters, stories to surprise and delight and stories to generate empathy and help from others. Psychologists recognise that the story format gets a different kind of attention in our brain - it is 'psychologically privileged'.

### Teaching Science Through Stories | WowScience - Science ...

Science Through Stories is a collection of stories hand-picked to engage young learners with the awe-inspiring world of science. Traditional tales rub shoulders with historical stories and stories that have been specially written for this book, all of which have been classroom tested. Each tale is written in a storyteller's voice to make it easier to learn and retell orally.

2. Story Telling. Students love to hear stories and therefore, storytelling is one of the best ways to get their attention in class. Teacher can explain the facts of biology or the laws of physics in the form of stories. This is a mental organizer as human brains can remember stories than just plain facts.

### 50 Innovative Teaching Methods in Science | Edsys

'Science Through Stories' goes one step further. By teaching children to tell a science story, you teach them to tell the science. Oral rehearsal of the facts and sequences in a science topic can help children to visualise and internalise the learning. Children write about science concepts in English tasks and improve their understanding of the story in their science lessons.
