

## Section 37 3 The Respiratory System Answers

Eventually, you will unquestionably discover a additional experience and expertise by spending more cash. yet when? do you acknowledge that you require to get those all needs similar to having significantly cash? Why don't you attempt to get something basic in the beginning? That's something that will lead you to comprehend even more nearly the globe, experience, some places, later history, amusement, and a lot more?

It is your unconditionally own time to sham reviewing habit. along with guides you could enjoy now is **section 37 3 the respiratory system answers** below.

With more than 29,000 free e-books at your fingertips, you're bound to find one that interests you here. You have the option to browse by most popular titles, recent reviews, authors, titles, genres, languages, and more. These books are compatible for Kindles, iPads and most e-readers.

### Section 37 3 The Respiratory

The respiratory system is responsible for the exchange of oxygen and carbon dioxide. Air moves through the nose, pharynx, larynx, trachea, and lungs. After reaching the lungs, the trachea branches into smaller and smaller tubes called bronchioles, which end in alveoli, or air sacs.

Section 37-3 The Respiratory System (pages 956-963) This section identifies the structures of the respiratory system and explains how we breathe. It also describes how smoking affects the respiratory system. What Is Respiration? (page 956) 1. The process by which oxygen and carbon dioxide are exchanged between the lungs and

## **The Human Respiratory System What Is Respiration?**

Your respiratory system is made up of a pair of lungs, a series of passage- ways into your body, and a thin sheet of skeletal muscle called the diaphragm. When you hear the word respiration, you probably think of breathing. But breathing is just part of the process of respiration that an oxygen-dependent organism carries out.

## **Chapter 37: Respiration, Circulation, and Excretion**

Inhalation Exhalation Section 37-3. Figure 37-15 The Mechanics of Breathing. Go to Section: • Breathing is not a completely voluntary or involuntary act • The rate of breathing is controlled by the medulla oblongata - The brain is sensitive to the amount of CO<sub>2</sub> in the blood.

## **The Respiratory System - Valhalla High School**

Ch. 38 Section 3 The Respiratory System. Key Terms: Pharynx - a muscular tube in the upper throat that serves as a passage way for air and food Larynx - Passage way for air known as the voice box Trachea - Long straight tube in the chest cavity known as the wind pipe that air passes through
