The Domestic Cat: The Biology of its Behaviour | Amazon.com.br

The domestic cat is a member of the Felidae, a family that had a common ancestor about 10-15 million years ago. The genus Felis diverged from the Felidae around 6-7 million years ago. Results of phylogenetic research confirm that the wild Felis species evolved through sympatric or parapatric speciation, whereas the domestic cat evolved through artificial selection.

Cat - Wikipedia

Cats have lived outdoors for thousands of years.They are part of the natural landscape, and there are many biological and behavioral reasons why they are not a threat to other species. But opponents of Trap-Neuter-Return (TNR) still accuse outdoor cats of being responsible for the decline of birds or wildlife.

Biology & Behavior of Cats - What they Eat & More

The most commonly kept domestic animal in the developed world, the cat has been a part of human life for thousands of years. Cats have been both worshipped and persecuted over this long period - either loved or hated for their enigmatic self-reliance and the subject of numerous myths and fables.

The Domestic Cat: The Biology of its Behaviour / Edition 3 ...

The domestic cat can be traced to the African Wild Cat. The species became close to humans in ancient Egypt. Cats are athletic and agile, which contributes to their skill as predators. Felis silvestris catus is the scientific name for the domestic, or house cat, whose closest relative is the species Felis silvestris lybica, the African Wild Cat.

The domestic cat is a member of the Felis lineage. A number of investigations have shown that all domestic varieties of cats come from a single species of the Felis lineage, Felis catus.

Evolution of the domesticated cat - Wikipedia

Many cats that are rendered to a shelter fail to find a new home. Older and other less desirable cats may face a significant amount of time in the shelter prior to adoption. Therefore, the present study compared the behaviour of domestic cats subjected to different lengths of time, room density (RD) and sex ratio in a shelter.
